

ULTRASONIC CLEANING

- 35 LITER TANK
- OSCILLATING BASKET
- NATURAL / SYNTHETIC / PCD DIAMOND

The universal **UDC 3528** cleaner can be used in any workshop. The efficiency of the ultrasound allows the removal in a few minutes of greasy or sticky residues of a very large quantity of tools. It is specifically designed for industrial use.

Main features

- Programmable - Autonomous operation
- High ultrasonic performance - 1200 W/ 28 KHz
- Heating tray up to 70°C with safety system
- 35 litre capacity - Simultaneous cleaning of 150 dies
- Anti-heat security and digital counter
- Anti-overflow system and cover with secure opening
- Drain device
- Oscillating basket included for optimized cleaning

Technical specifications

- Temperature : 30 up to 70 °C
- Power supply : 230 V 16 A 50/60 Hz 1 Ph
- Ultrasonic generator : 1200 W / 28 KHz
- Consumption : 3200 W
- Weight : 85 Kg

Dimensions :

| mm | Tray + swinging basket | Inner tank |
|----|------------------------|------------|
| I. | 570 | 300 |
| L. | 920 | 500 |
| H. | 850 | 250 |

BALLOFFET

- Reduced cleaning costs
- Independent work
- Operator safety
- Diamond and carbide dies
- Optional mesh separator
- Easy start
- Ergonomic design
- BALLOFFET warranty - CE compliance
- Excellent return on investment
